

Mid West Health open day

Thursday, 26 October 2006

On Sunday October 22 Mid West Health at Streaky Bay held a Health Open Day.

The day was officially opened by Bevan Francis, General Manager of Country Health SA for the North, Far West and Eyre Peninsula.

The open day was an opportunity for Mid-West Health to show off all of the work that has been done to improve the facilities at Streaky Bay.

The day was held on the beautiful improved lawn area, which has both outdoor seating and a playground for the children.

The official opening of the extension to Elmhaven was also held.

The extension consists of the new reception area and staff room.

The extension was funded using a bequest from former Elmhaven resident, Arthur Aubrey, and was officially opened by Mr Leon Roberts.

The open day was to celebrate the generous support of the community for the local health services and also to thank all of those who donate and volunteer their time, effort or money.

A great fashion show was held by Harry Brown's Store, pony rides and face painting were available for the kids, the Streaky Bay school kids performed some singing and guitar playing and some of the In-step dancers performed a great dance.

The new local district phone book, which was produced by the Mid-West Health Streaky Bay Hospital Advisory Committee, was also launched on the day.

The weather was perfect for the day and the beautiful sunshine mixed with the great views of the bay that the hospital and health services have made the day a great family fun day out.
